Students listened attentively to the library guidance. They seemed to be looking for their favorite place during the library tour.

**Face-to-face Guidance**

**Laboratory Guidance**

You can always visit the Library website to view "How to Find Articles (Japanese/English)" and "Digital Tour". It is very popular with more than 4,500 accesses!

**Library tour**

I want to use the library extensively to improve my college life.

I found that there are many facilities and features that make learning more comfortable for students.

I learned about effective use of the library.

**Students VOICES** (from questionnaires)

I got the impression that it was a very comfortable environment for studying, partly because it was surrounded by greenery.

The building is very clean and has a calm atmosphere, so I would like to use it when studying for exams and writing reports.

I would like to make it easier for us to use the system.

I would like to visit regularly to obtain new knowledge and necessary information.

**SDGs corner is being set up**  
Books related to the SDGs, the 17 goals to fight against poverty, conflict, and climate change that must be addressed worldwide by 2030, are now on display. Why not start by learning about the SDGs as they relate to the future of each and every one of us?

**Created by the library's student staff**  
Student staff working at the library produced a promotional video for the Book Garden. This video seems to have been accessed especially by first-year students. We received comments that they had seen the promotional video and it was highly rated at the site.

**How to create a research plan and portfolio**  
A research plan or portfolio is required for entering a higher-level school and job hunting. We introduce reference materials that will help you prepare them. In these materials, you will find thorough explanations on key points, useful ideas and expressions as well as examples of actual cases. Please refer to them!
